

Execute a secure, modern cloud strategy aligned with business objectives

As an extension of your internal team, our expert technologists help you manage, optimize, and secure your cloud environments with a holistic approach that prioritizes security and compliance.

Without critical security policies, operational processes, and management tools in place, your business can be exposed to increased risk, uncontrolled cloud sprawl, fragmented reporting, and unreliable metrics. The stakes are even higher if you have regulatory compliance requirements such as PCI, GDPR, HIPAA, FedRAMP, FISMA, and industry-specific standards.

Our Modernization Engineers™ apply in-depth knowledge of cloud-native and traditional IT environments across AWS Cloud, VMware, and VMware Cloud on AWS.

- SaaS Services Competency
- Govt. Services Competency
- DevOps Services Competency
- Migration Services Competency

- Nonprofit Services Competency
- Digital CX Services Competency

Benefits

- ▶ Eliminate administrative burdens
- ▶ Free internal teams to focus on projects that drive business value
- ▶ Improve and automate security
- ▶ Access specialized cloud expertise
- ▶ Increase performance and availability
- ▶ Optimize cloud spend
- ▶ Develop blueprint for future modernization

Access to AWS Funding

As an AWS Premier Consulting Partner with multiple competencies and service delivery designations, we have access to funding programs that support migration initiatives to accelerate innovation.

Experience managing complex environments for commercial enterprises and public sector customers

Experience ▶ Expertise ▶ Execution

Effectual is an AWS Premier Consulting Partner offering cloud first managed and professional services that enable modernization for commercial enterprises and the public sector.

Implement a modern, security first approach and optimize the performance of your cloud environments

We follow a shared responsibility model that reduces your operational burden while ensuring compliance and protecting the security of your infrastructure. This gives your internal teams the ability to focus on projects and initiatives that deliver business value, as well as the core competencies that differentiate your organization.

We partner with your organization to establish robust security-minded strategies based on the AWS Well-Architected Framework and Center for Internet Security (CIS) Level 1 benchmarks for commercial enterprises and the public sector.

Overall expected cost savings from managed cloud services

— IDC Managed CloudView 2021 Survey

Supported Technologies

- ▶ AWS Cloud
- ▶ AWS GovCloud
- ▶ VMware Cloud on AWS
- ▶ Virtual Machines
- ▶ Containers
- ▶ Serverless
- ▶ Applications
- ▶ Databases

Core Features Included

- ▶ Cloud Infrastructure Procurement
- ▶ Ongoing Cost Monitoring
- ▶ Customer Operations Runbook
- ▶ Custom Alert Configuration
- ▶ Next Generation Monitoring with anomaly detection & predictive analytics
- ▶ 24x7 CloudOps Support
- ▶ Data Protection
- ▶ Monthly & Quarterly Service Review

Security Features Included

- ▶ 24x7 Security Operations Center
- ▶ Proactive Threat Hunting
- ▶ Vulnerability Management
- ▶ Asset Discovery
- ▶ Patch Management
- ▶ Anti-Malware
- ▶ Ransomware Protection

Additional Security Features Available

- ▶ Multi-Factor Authentication (MFA)
- ▶ File Integrity Monitoring (FIM)
- ▶ Intrusion Detection & Prevention System (IDS/IPS)
- ▶ Web Application Firewalls (WAF)
- ▶ DDoS Protection
